

Summary

Computer Science Engineering student skilled in Java and backend technologies like Spring Boot. Passionate about full-stack development and building practical solutions. Looking for an internship to gain hands-on experience and contribute to real-world software projects.

Skills

Education

Durgapur Institute of Advanced Technology and Management

B.Tech in Computer Science Engineering, CGPA: 8.01 till 5th sem

Projects

- **Fake News Detection System** : Build a model using Natural Language Processing (NLP) to classify news articles as real or fake based on their content. Use datasets like LIAR or FakeNewsNet and train models such as Logistic Regression, SVM, or BERT for better accuracy.
- **Customer Churn Prediction** : Develop a predictive model to identify customers likely to stop using a service. User customer behavior data (e.g., transactions, support interactions) and apply machine learning algorithms like Random Forest or XGBoost to predict churn.

Areas Of Interest

- Artificial intelligence and machine learning
- Data Analysist
