Bonus Features

Additional Feature	Purpose
Live Visitor Counter	Show real-time page views (MongoDB counter)
Deploy Projects from GitHub	Integrate GitHub API to auto-show repos
Comment System on Blog	Use MongoDB to allow comments
Search Bar	Filter projects or blog posts
Multilingual Support	Add a language switch (i18n in Next.js)
Media Upload	Upload images for projects (Multer + Cloudinary)
Admin Analytics	Show total views, likes, etc. using MongoDB

FlowChart

Step 1	Build frontend UI using Next.js + Tailwind
Step 2	Create Express backend with API routes
Step 3	Connect MongoDB for storing project & contact data
Step 4	Protect admin routes using JWT auth
Step 5	Add deployment (Vercel for frontend, Render or Railway for backend)
